This allows you to choose the position of your caption box.

Caption Box Colour

Caption Align

left

Caption Alignment

This allows you to choose the position of your caption box.

Integration Type & Link

Integrations allow you to add videos, external links, virtual tours, forms and more

Integration Type

Youtube

Integration Link

Integration Link

EXTERNAL VIDEOS

First, you need to upload your video to your host, then simply paste the URL into the integration link field.

PLEASE MAKE SURE THE VIDEO IS MP4 FORMAT

YouTube

PRO: YOUTUBE

First, you need to find your video on YouTube.

Then you need to click in the area where the URL is located. Youtube URLs are usually very long, here is an example URL:

<https://www.youtube.com/watch?v=gYy9HXhCXHo&list=PLAwL8Kl4ijMqNoLU-rg5wlxXn5tcIXlql>

Now you do not need the entire URL, you only need the items after “?v=” up to the “&” for example:

<https://www.youtube.com/watch?v=gYy9HXhCXHo&list=PLAwL8Kl4ijMqNoLU-rg5wlxXn5tcIXlql>

You have to be careful about anything at the end of the URL that has the & symbol and you would want to remove that part of the URL.. Here is an example:

https://www.youtube.com/watch?v=ZuMNO4xOO34&list=PLB2MlqwGG_FmIE6XUc-QOD6SkciAziVIZ&index=7

you will notice at the end there is “&list=” and “&index=7” as this code tells YouTube either which video in the playlist you are on or where in the video you are if you have started watching one of the videos in a playlist. This will not work with promotions pro, so you will want to remove it.

Enter this number into the integration link field

vimeo

PRO: VIMEO

First, you need to find your video on Vimeo.

Then you need to click in the area where the URL is located. Vimeo URLs are very simple, here is an example URL:

<https://vimeo.com/483582064#t=5s>

Now you do not need the entire URL, you only need the items after "/" up to the "#t=" for example:

<https://vimeo.com/483582064#t=5s>

You have to be careful about anything at the end of the URL that has the # symbol and you would want to remove that part of the URL.. Here is an example:

<https://vimeo.com/483582064#t=5s>

you will notice at the end there is "#t=5s" as this code tells Vimeo where to start the video. This will not work with promotions pro, so you will want to remove it.
